

# Green Energy Partners/Stonewall (GEP/S) Hybrid Energy Park

ZMAP 2009-0005/SPEX 2009-0009/CMPT 2009-0001

Planning Commission Public Hearing  
December 17, 2009

# GEP/S Hybrid Energy Park Request

## ☐ ZMAP

Rezone 90.5 acres from  
TR-10 & JLMA-20 to  
MR-HI

## ☐ SPEX

Develop electricity  
generating &  
transmission facility

## ☐ CMPT

Location, character &  
extent in accord with  
Comprehensive Plan

Example of proposed facility

# GEP/S Hybrid Energy Park - Vicinity

# GEP/S Hybrid Energy Park

## Existing Conditions

- ☐ Heavily treed
- ☐ Wetlands & streams
- ☐ Habitat
- ☐ Very steep & moderately steep slopes
- ☐ Diabase & hydric soils

Sycolin Creek

# GEP/S Hybrid Energy Park

## Existing Conditions - Overlay Districts

 QN

 AI (1 mile of Ldn 60)

FOD:

 major

 minor

# GEP/S Hybrid Energy Park

## Existing Conditions

Underground gas lines

Overhead electrical lines

# GEP/S Hybrid Energy Park

## Existing Conditions - Archaeological & Historic Resources

House ruins & barn c. 1925-1950

African American settlement - Lower Sycolin Community

- ☐ Proffered to preserve
- ☐ Staff recommends producing an historical narrative

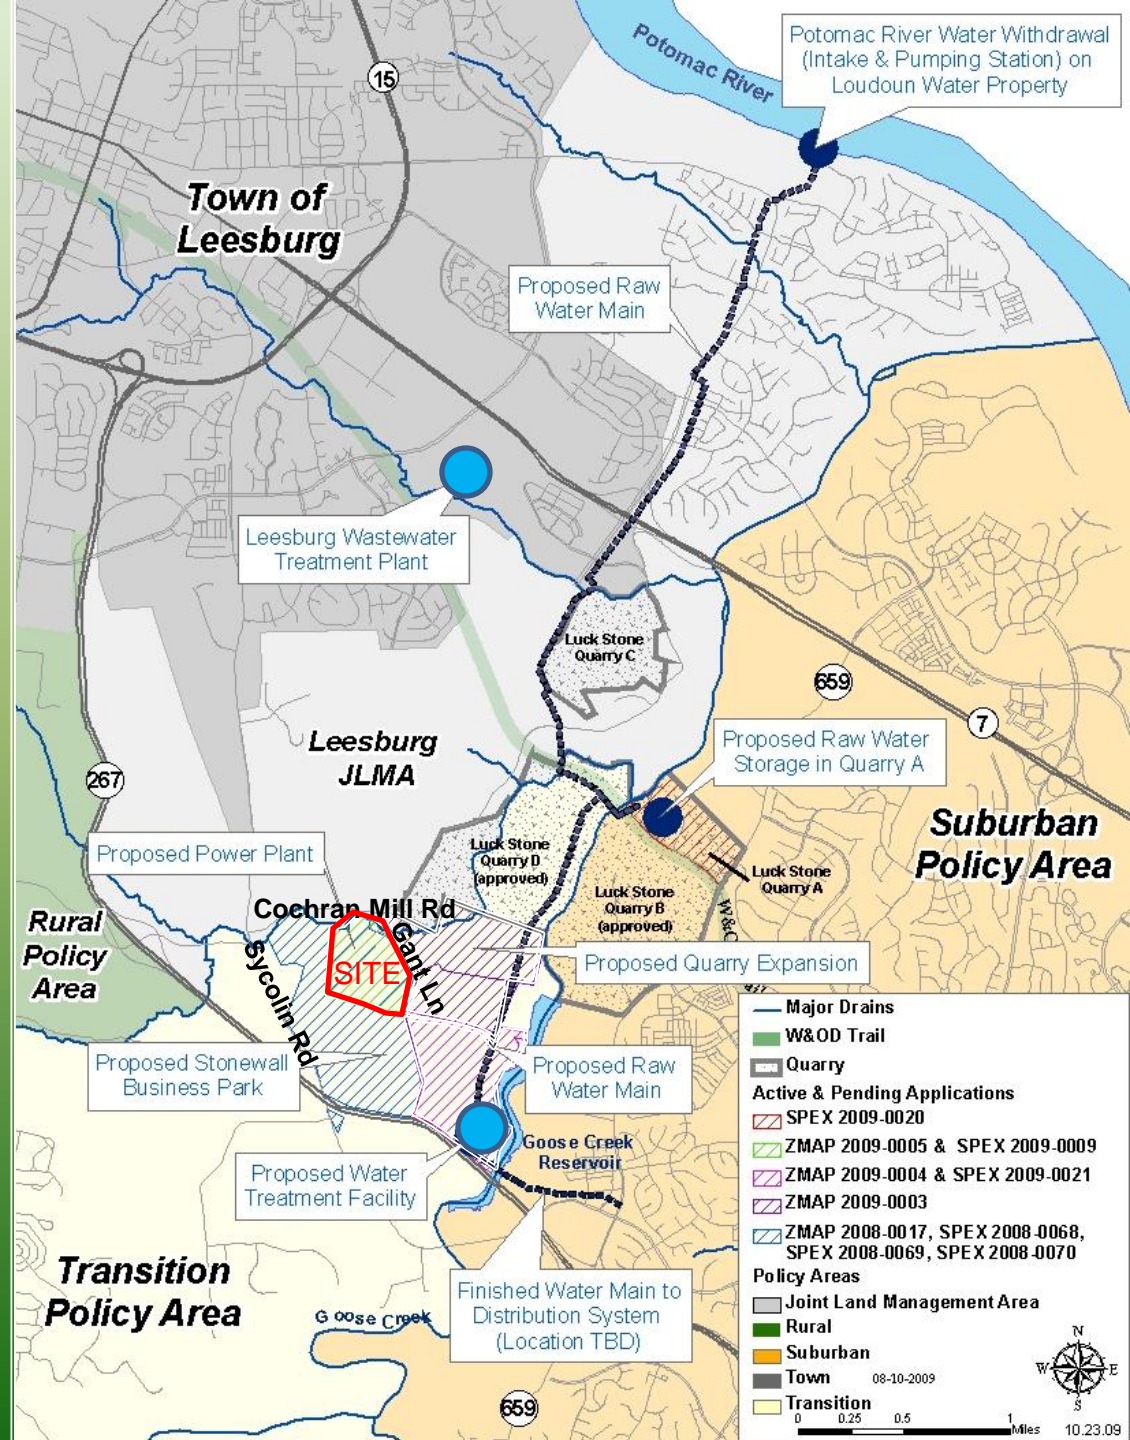

□ Facility that generates & transmits electricity - 981 MW

- 
- The site plan illustrates the proposed solar facility layout. Key components include:
- Water Storage:** Located in the upper right area.
  - Tree Save:** Two designated areas for tree preservation, one in the upper left and one in the center.
  - Cooling Tower:** Situated near the center, adjacent to the tree save area.
  - Solar Array/Open Space:** A large hatched area on the right side of the plan.
  - Switch Yard:** A rectangular area located between the solar array and the turbines.
  - Turbines:** A row of yellow rectangular structures on the left side.
  - Gas Lines:** Indicated by a red line running vertically through the center.
  - Electrical Transmission Lines:** Indicated by an orange line running vertically on the right side.
  - Other Features:** Includes a "SAND POND" in the upper left, "SCHOOL BUS & VISITOR PARKING AREA", "EX. ARCHAEOLOGICAL SITE", "GANT LANE - ROUTE 652", and "SOLAR ARRAY OR OPEN SPACE".

# Hybrid Energy Park Water Source

- ❑ Use 5 million gallons water/day
- ❑ Effluent from Leesburg Wastewater Treatment Plant
- ❑ Water from Loudoun Water

# GEP/S Hybrid Energy Park Zoning Issue

# GEP/S Hybrid Energy Park

## Land Use - Energy Policies

- ❑ Apply Countywide

- ❑ If clean burning & environmentally sound, can be located where impact on surrounding land uses & environment is compatible

- ❑ Must complement community land use strategies

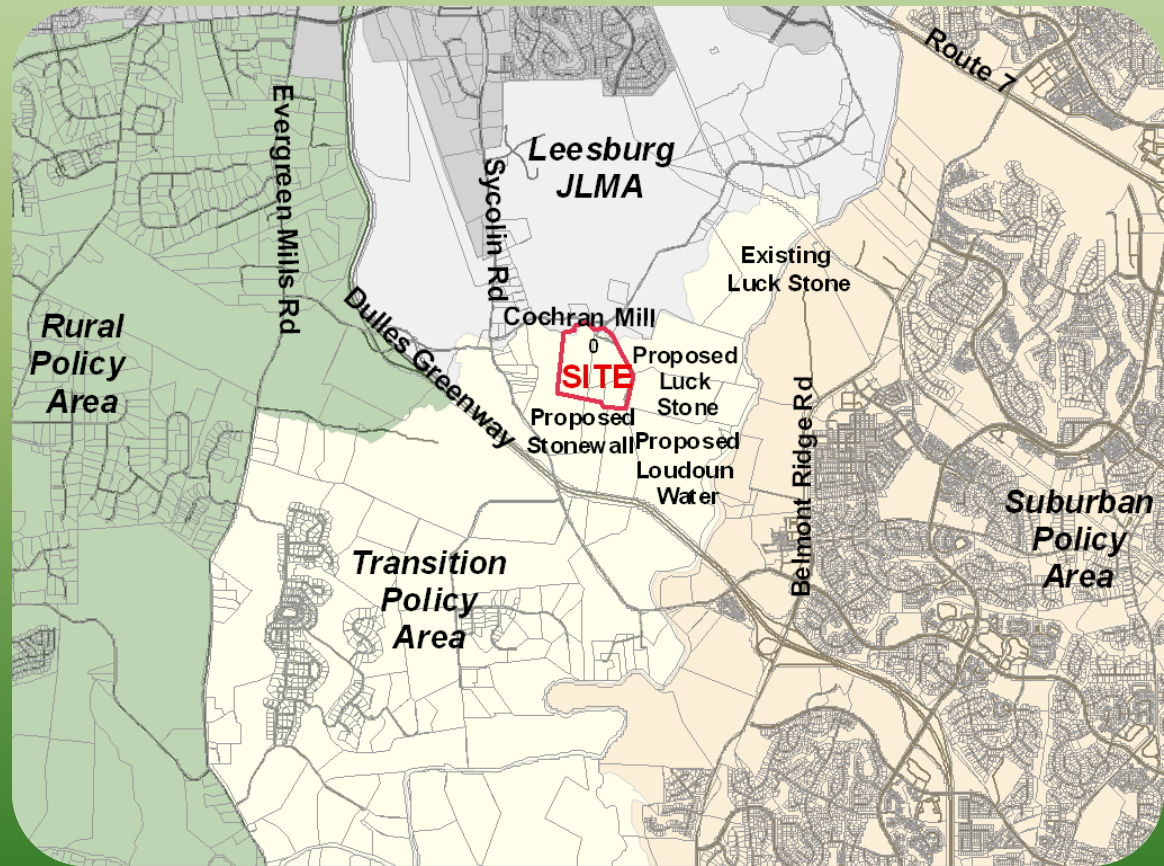

# GEP/S Hybrid Energy Park

## Land Use Policy - Transition Policy Area

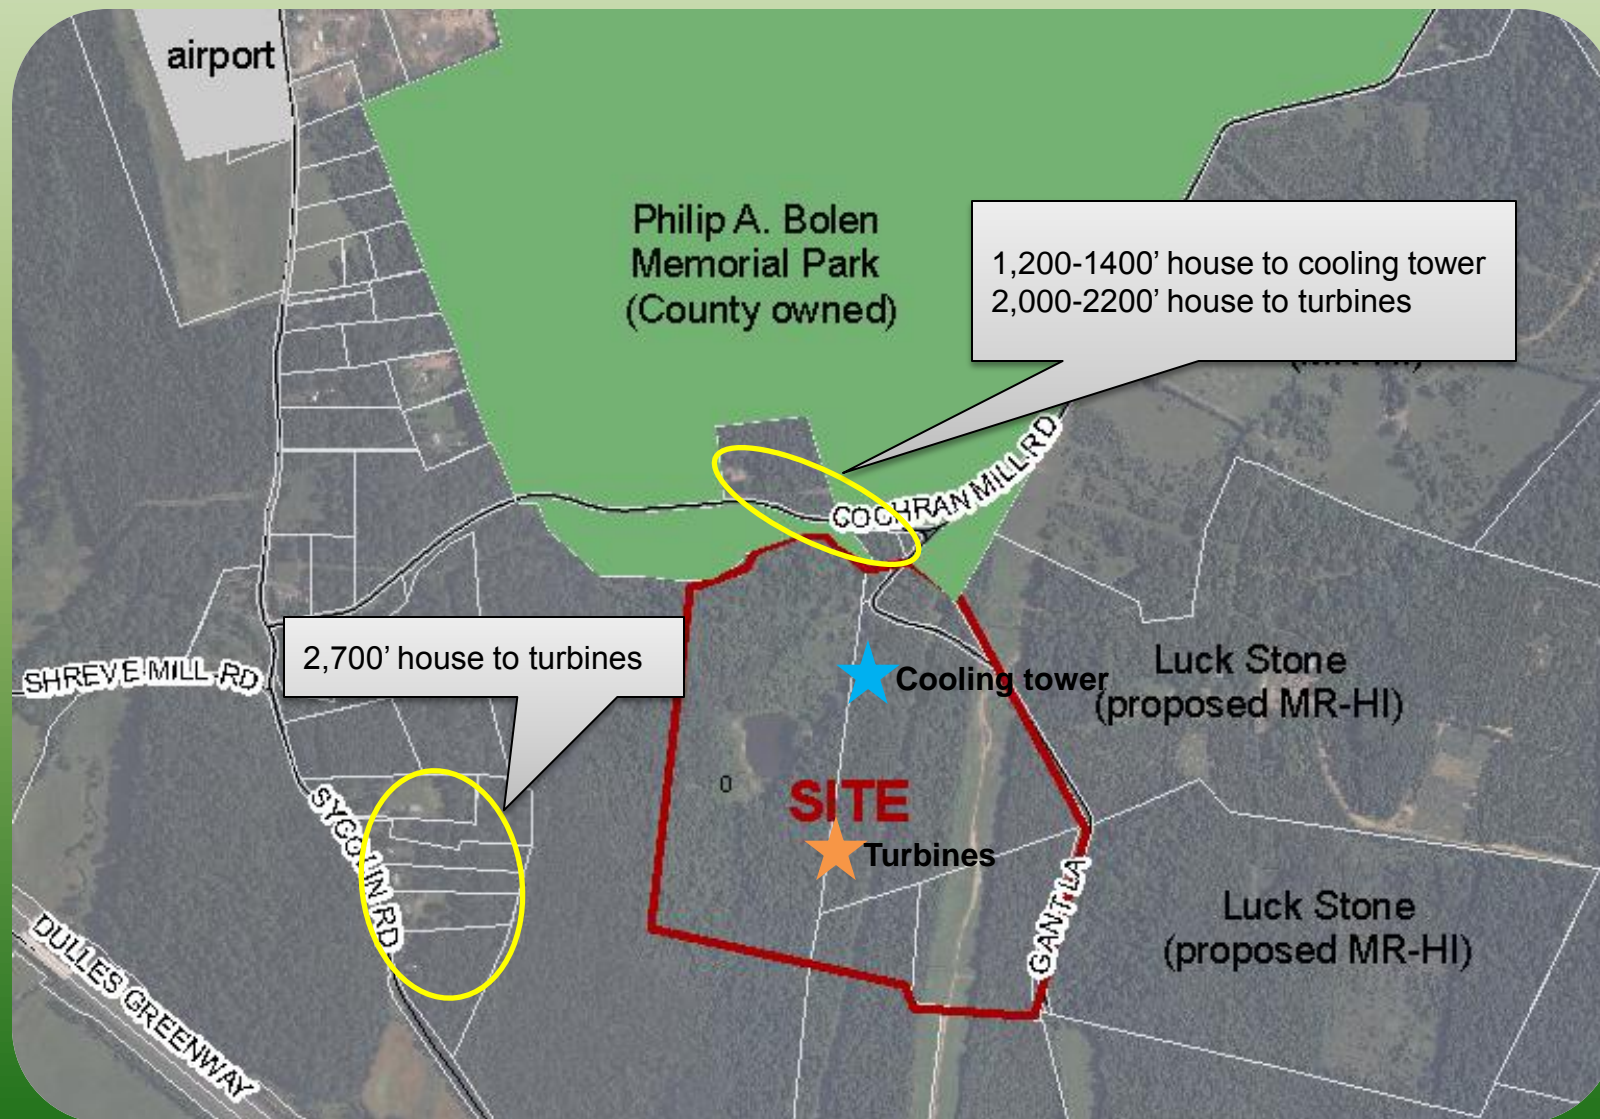

### Lower Sycolin Subarea

- ❑ Low density & rural
- ❑ 70% open space as predominant visual element
- ❑ Provide visual & spatial transition between Rural & Suburban Policy Areas
- ❑ Protect drinking water of Goose Creek Reservoir

# GEP/S Hybrid Energy Park Compatibility with Park & Residential

# GEP/S Hybrid Energy Park

## Impact

### ☐ Air Quality

- Nitrogen oxides
- Carbon monoxide
- Sulfur dioxide

*“insignificant per EPA”*

### ☐ Water Quality

- 0 discharge
- Higher risk of contamination
- Aqueous ammonia & propane

### ☐ Steep Slopes & Wetlands

- Intent no impacts

## Mitigation

- ☐ Condition - limit maximum emissions

- ☐ Condition - water quality monitoring & remediation

- ☐ Condition - mitigate unforeseen impacts

# GEP/S Hybrid Energy Park

## Impact

### ☐ Noise

- Safety relief valves
- Combustion turbines

### ☐ Tree Removal

- Tree removal -  
hardwoods & VA  
Pine

### ☐ Loss of Habitat

## Mitigation

### ☐ Condition

- Maximum noise levels
- Use silencers on relief valves
- Noise study
- Noise monitoring &  
remediation

### ☐ Concept Plan

- Preserve 13.5 acres
- Reforest 8.69 acres used for  
staging

### ☐ Proffer to measures to protect wood turtle

# GEP/S Hybrid Energy Park Visual Impacts

**Combined  
Cycle Facility  
Example**

**Vapor Plume  
Examples**

# GEP/S Hybrid Energy Park Transportation Impacts

Gant Lane bridge, Sycolin Creek

- ☐ Proffer to improve Gant Lane with adjoining property owners or access easement to Sycolin Road

# Hybrid Energy Park

## Solar Array v. Open Space

- ❑ 68% open space & no solar array
- OR
- ❑ 52% open space & 14 acres of solar arrays (up to 4 MW power)

*70% open space per policy*

# PC Briefing

- ☐ CPAM - is one needed?
- ☐ MR-HI - intended for Luck Stone's temporary quarrying use?
- ☐ PD-GI - was it considered?
- ☐ Chesapeake Bay - how would it apply?
- ☐ Lower Sycolin Community - fair share of historical narrative

# Staff Findings & Recommendation

- ❑ Use may be reasonable given the natural gas lines, electrical transmission lines & proximity to quarry uses, as long as compatibility issues & impacts upon surrounding uses & environment are mitigated.
- ❑ Work Session
